The following is an examiner's statement of reasons for allowance:

With regard to claims 16-19 and 31: Regarding claim 16, a review of prior art failed to make obvious, disclose or fairly suggest a circulator comprising at least one mirror in optical communication with the plurality of polarization beam splitters, garnets and at least one wave plate in addition to the accompanying features of the claim.

Regarding claim 17, a review of prior art failed to make obvious, disclose or fairly suggest a circulator comprising a wave plate coupled to the beam splitter in addition to the accompanying features of the claim.

Regarding claim 18, a review of prior art failed to make obvious, disclose or fairly suggest a circulator comprising a second beam displacer optically coupled to a second wave plate in addition to the accompanying features of the claim.

Regarding claim 31, a review of prior art failed to make obvious, disclose or fairly suggest a core comprising a garnet disposed between a first and second wedge in addition to the accompanying features of the claim.

With regard to claims 2-10, 21-25, 27-30 and 32-33: These claims would be allowable over the prior art of record because they are dependent from allowable claims.
